STACK

- Javascript/Typescript
- ReactJs, NextJs, Angular
- Bootstrap, Tailwind, MaterialUI, Ionic
- HTML/CSS
- NodeJs, Git, Docker, Bitbucket
- Redux, APIs, Axios
- React-hook-form, highcharts
- Vercel, Strapi, CMS

EDUCATION

Computer Engineering Degree

Polythecnic University of Madrid

2020

I developed a web page for my final degree project with a grade of 10.

B2 English Advanced

Official School of Languages

2012

LANGUAGES

English
B2

Spanish

PROFILE

As a front-end web developer with more than 4 years of experience, I master cutting-edge tools like React, Angular, Node.js, and Bootstrap, understanding their inner workings to adapt them efficiently. My goal is to balance the creation of intuitive interfaces with technical and business needs, working as a team and constantly learning to stay up-to-date with the latest trends. I believe in technology as a means to change the world and seek to contribute to this from my role.

WORK EXPERIENCE

Senior Front-End Developer

Amaris Consulting | Madrid   2022 - Present

- Engineered an end-to-end eCommerce platform from scratch using ReactJS and NextJS, effectively contributing to the company's digital transformation and growth.
- Optimized web performance by developing efficient, reusable, mobile-first components, which enhanced the platform's responsiveness and user experience.
- Managed and streamlined API calls to the back-end, ensuring seamless data flow and integration between front-end and back-end systems.
- Leveled up the site aesthetics by implementing superior design and styling using CSS, Tailwind, and Bootstrap, leading to increased user engagement.
- Employed Agile methodology with 2-week sprint cycles, facilitating rapid iterations, efficient project management, and quick response to changes.
- Utilized Git for version control, maintaining code consistency, ease of collaboration, and effective tracking of project progress.
- Integrated Stripe for secure payment processing and Vercel for deployment and hosting, enhancing overall platform functionality.
- Leveraged Redux for predictable state management, improving debugging and testing capabilities.
- Led and mentored a team of 4 developers, fostering an environment of learning, collaboration, and high-quality code output.

Front-End Developer

NTTData | Madrid   2020 - 2022

- Actively participated in the development of three diverse projects spanning eCommerce, banking, and health insurance sectors, demonstrating versatility and adaptability in different business contexts.
- Leveraged Angular and ReactJS for creating dynamic user interfaces, enhancing user experience and interactivity across all applications.
- Employed Bootstrap and Tailwind for responsive design, ensuring optimal web performance across various devices - mobile, tablet, and desktop.
- Utilized NodeJS for server-side scripting, improving scalability and efficiency of the applications.
- Managed version control using Git and Bitbucket, facilitating effective collaboration and ensuring code consistency throughout the development lifecycle.

- **Front-End Technologies:** Proficient in Angular, ReactJS, and NextJS for crafting dynamic, responsive, and user-friendly web interfaces.
- **UI/UX Design**: Skilled in utilizing CSS, Bootstrap, and Tailwind for implementing visually appealing and highly interactive designs.
- **Version Control:** Experienced in using Git, Bitbucket for version control, ensuring code consistency and facilitating effective collaboration.
- **Server-Side Scripting:** Proficient in NodeJS, enhancing application scalability and efficiency.
- **API Communication:** Experience with Axios for streamlined data transfer between front-end and back-end systems.
- **Project Management Tools:** Well-versed in Jira for issue tracking and project management.
- **Cloud Services:** Experienced in leveraging AWS for improved scalability and application availability.
- **Security and Performance:** Expertise in using Kiwuan for ensuring code security and optimization.
- **Agile Methodology:** Experienced in working with Agile methodology and 2-week sprint cycles for efficient project management.

SOFT SKILLS

- **Leadership**
- **Collaboration**
- **Problem-Solving**
- **Time Management**
- **Adaptability**

WORK EXPERIENCE

Front-End Developer

NTTData | Madrid   2020 - 2022

- Prioritized code security and optimization using Kiwuan, reducing vulnerabilities and enhancing performance.
- Fostered high levels of team communication, encouraging effective problem-solving and collaboration, thereby boosting overall team productivity.
- Developed and improved web components with a focus on full responsiveness, ensuring seamless functionality and user experience across platforms.
- Implemented API communication with Axios, streamlining data transfer between front-end and back-end systems, and enhancing overall application functionality.

Front-End Developer

Accenture | Madrid   2019 - 2020

- Developed robust web components leveraging the latest versions of Angular and ReactJS, contributing to the creation of interactive and dynamic user interfaces.
- Operated in an Agile methodology environment, working in 2-week sprints, which facilitated rapid iterations and efficient project management.
- Utilized AWS for cloud services, enhancing the scalability and availability of the developed applications.
- Managed version control using Bitbucket, ensuring code consistency and effective collaboration throughout the project.
- Employed Jira for issue tracking and project management, improving team productivity and project coordination.
- Gradually assumed increased responsibilities, successfully adapting to higher complexity tasks and demonstrating quick learning and agility in a fast-paced environment.
- Thrived in a highly collaborative setting, gaining valuable insights and skills from senior team members, which accelerated professional growth and development.
- Balanced work commitments with academic responsibilities during the final year of college, showcasing exceptional time management, prioritization, and resilience.

PERSONAL PROJECTS

- **Freelance Website** - Link
  - Developed a professional website as a freelance project using ReactJS, MaterialUI, TypeScript, and Vite. The website demonstrates my ability to create modern and responsive web applications.

- **Spotify App** - Link
  - Built a replica of the Spotify app leveraging ReactJS, Redux, Tailwind, and Rapid API. This project showcases my understanding of complex state management using Redux and my proficiency in crafting responsive UI using Tailwind.

- **Gifs App** - Link
  - Created a Gifs application using Angular 12, TypeScript, Sass, and APIs. This project underlines my expertise in Angular and my proficiency in utilizing APIs to fetch and display data.
